

## Baxi Heating Environment Statement

### Policy

We value our reputation as an environmentally conscious and responsible business and actively engage our people and key stakeholders to ensure they comply with our policies and procedures.

At a UK and Ireland and local level, we have identified our key risks and opportunities to ensure we behave in an environmentally conscious way, proactively looking to reduce the negative impact of our activities, products and associated services on the world in which we live.

We have implemented a certified Environmental Management System to ISO 14001 on our two manufacturing sites and our commercial business to enhance our environmental performance. Environmental priorities are discussed in the Baxi Heating UK and Ireland Safety and Environmental Steering Group and performance is reviewed annually by the UK Executive.

### Objectives

- Compliance to all relevant environmental laws and regulations.
- Make our employees, contractors and others working on our premises comply with appropriate environmental requirements.
- Protect the environment including preventing pollution at source and responding appropriately to any environmental issues.
- Encourage cooperation with our supply chain to facilitate good environmental practice.
- Set and review objectives and targets at a UK and Ireland and local level to minimize our impact on the environment and, through our commitment to continual improvement, enhance our environmental performance.
